**Gene List(s)**

Use the following form(s) to refine the parameters and add the gene list to a strategy:

Expanded versus Initial Adherent - Human Islet Cultures	
Fold Change  Greater Than:	<input type="text" value="1.5"/>
Confidence Level:	High Confidence <input type="radio"/> All Results <input checked="" type="radio"/>
<i>For a microarray experiment a result with high confidence has a confidence level of at least 80%.</i>	
<i>For a ChIP-chip experiment a result with high confidence has a confidence level of at least 90% and all fold changes are positive.</i>	
Reference (Denominator):	initial adherent
